

A top ENR 500 Design Firm, Hussey, Gay, Bell & DeYoung (HGBD) has provided professional engineering and architectural services in Georgia and South Carolina for more than five (5) decades. Individually, since the late 1970s, HGBD has provided a range of services to the City of Statesboro and Bulloch County including water and sewer systems master planning and infrastructure upgrades to transportation systems design and architectural design services.

From the expansion of the award-winning Statesboro Wastewater Treatment Plant from 1.5 MGD to 10 MGD to the design of nearly fifteen (15) miles of water and sewer transmission mains ranging from 2" to 24" to the David H. Averitt Center for the Arts and the Bulloch County Agri-Business Center – HGBD has designed more than fifty (50) local projects for the City and County.

With full operations in Savannah and Atlanta, Georgia, and Charleston and Columbia, South Carolina, the firm provides full design service in the fields of transportation, drainage, civil, water and wastewater systems, solid waste, site development, master planning, landscape architecture, geotechnical engineering, environmental engineering, surveying, architecture, and planning services, in addition to program management.
