

DEMOLITION PERMIT APPLICATION

Permit No. _____

APPLICANT INFORMATION	Applicant _____ Mailing Address _____ City/State/Zip _____ Telephone _____ Email _____
PROPERTY INFORMATION	Demo Address _____ Property Owner(s) _____ Is the property in the DSDA boundary? YES / NO If yes, what is the age of the structure? _____
CONTRACTOR INFORMATION	Contractor _____ Contractor Address _____ City/State/Zip _____ Telephone _____ Email _____
APPLICANT RESPONSIBILITIES	<ul style="list-style-type: none"> • Permit fee of \$75 is due at time of submission. • Demolition may not begin until you have been issued a permit from the Planning and Development Department. It usually takes 6-8 business days for a permit to be issued. • GA State Law requires the property owner and each contractor to call Georgia 811 before any type of demo can begin to allow all utilities to be marked and located. Once Georgia 811 has confirmed that utilities have been located, then a permit can be issued. • When you call Georgia 811, you will be issued a dig ticket number. Please take note of that number below. • It is the applicant's responsibility to have all utility services properly "abandoned" and disconnected from the structure/site and cap any sewer laterals.

By signing below, I certify that I am legally able to perform a demolition on property that may contain materials regulated by the Georgia Environmental Protection Department to the legal standards of said department.

Applicant Signature _____ Date _____

Each owner or operator of a demolition and/or renovation activity must provide the Environmental Protection Division, Lead-Based Paint and Asbestos Program, with a written notice of their intent. Delivery of the notice must be made by U.S. Postal Service. The written notice must be on the Asbestos Abatement or Demolition Project Notification form provided by the Division. An Asbestos Project Notification form may be obtained directly from the EPD Lead-Based Paint and Asbestos Program. All RACM must be abated from the building prior to demolition. Notifications submitted for Abatement projects performed in conjunction with planned demolitions must include all Asbestos information regarding the project on one notification form. The project notification form should be completed by the Georgia licensed abatement contractor's agent. This agent is responsible for performing an inspection for the presence of RACM prior to the renovation/demolition activity. This inspection must take into consideration a building survey as may be required under AHERA. The abatement project requires a fee paid to the Division at the time notification is made. It is the building owners and contractors responsibility to properly evaluate both Category I and II asbestos materials to determine whether this material will be rendered friable due to the demolition activity. Where a planned demolition project reveals no RACM based on a building inspection, the demolition project notification may be completed by the demolition contractor or building owner.

Notification must be made prior to asbestos stripping, removal or any other activity, such as site preparation, that would break up, dislodge, or similarly disturb asbestos material, including demolition of buildings. The Georgia Rule 391-3-14 provides for a seven (7) calendar day notification requirement. The Federal NESHAP Rule requires a minimum ten (10) working day notification prior to project inception. To eliminate confusion and to comply with the Federal NESHAP Rule, which EPD is compelled to require and has authority to order under Georgia Rule 391-3-1-.02(9)(b)7, EPD will adopt the ten (10) working day, (Monday through Friday), project notification requirement as of June 1, 1999. Strict enforcement of this requirement will begin immediately thereafter. The postmark date will be counted as the first day of the ten (10) working day notification period. If the postmark falls on a week-end, the first day counted in the notification period will be the following Monday.
