3. Shared Parking Agreements. Joint or Shared parking arrangements involving two or more parcels must be committed to writing in an instrument acceptable to the Director of Planning/Community Development and approved by the owners of each of the affected properties or uses. 2. Notwithstanding the foregoing, the following may utilize contained alternative surfacing material to include, but not limited to, porous asphalt, turf, gravel, wood, mulch and cobble for spaces other than areas dedicated for disability access:

compatible with the character of the area or more suitable for environmental, drainage, storm water, or other relevant considerations. Administrative relief may be granted from this provision upon a showing of facts substantiating the requested relief, rather than upon a showing of hardship.

G. Proper grading to eliminate sheet flow of drainage water onto sidewalks, public rights-of-way, and abutting property shall be designed and constructed. Provisions may be necessary for the on-site collection and storage of drainage water. The effects of sheet flow may be mitigated by the use of pervious surfaces for parking facilities.

H. Adequate aisles and turn-around areas shall be provided so all vehicles may enter and exit the parking facility in a forward manner.

I. Clear and permanent markings shall be provided to define individual parking spaces, drive aisles, drive lanes, and intersections in accordance with specifications approved by the city engineer. Markings shall not be required of spaces used exclusively for demonstration of inventory.

J. Wheel stops shall be provided in all parking facilities that do not already have curbing for all spaces abutting property lines, buildings, and landscaping. No vehicle shall overhang a public right-of-way. They shall be a minimum of four inches in height and width and six feet in length. They shall be firmly attached to the ground and so constructed as to withstand normal wear.

K. Parking facilities shall be at all times maintained at the owner's expense in a clean, orderly, dust free, and undeteriorated condition and in conformance with the provisions of this section.

J. Parking facilities must be in conformance with the provisions of this section prior to the issuance of a certificate of occupancy for the building served by the parking facilities or an occupational tax certificate for a business on the property.

L. Parking facilities shall be constructed or enlarged and meet all applicable provisions of this article when a new building is constructed, an existing building is enlarged, additional dwelling units are created, or when a use is intensified by the addition of floor space, seating capacity, or change in use.

### **Section 1602. Required off street loading spaces.**

Loading spaces required under this section shall be at least 50 feet long and 12 feet wide. The regulations of this section are not applicable in the CBD district. B. Vehicles and other items as described above may be parked or placed on an unimproved surface only if located on a part of the property that is not between the house and a property line that is also a public right of way boundary and only if parked or placed in an orderly fashion.

D. The property owner shall be required to provide proof of a hardship sufficient to warrant a waiver.

E. All vehicles and other items referenced in section 1605.A shall have valid and current license and/or registration as required by the State of Georgia and shall be legally and safely operable as originally designed.

In the event of a conflict between the requirements of this section and any other access control and driveway standards and specifications in use by the City of Statesboro, the most restrictive specifications and requirements shall take precedence.

Section 2. All other sections of the Code of Ordinances not herein expressly amended shall remain in full force and effect.

Section 3. Should any section, subsection, or provision of this ordinance be ruled invalid by a court of competent jurisdiction then all other sections, subsections, and provisions of this ordinance shall remain in full force and effect.

**Re:** Consideration of a Motion to award a contract to the lowest quoter BRW in the amount (Not to Exceed) \$24,890.00 for the construction of a concrete slab for the Burnett Lime Equipment to be installed on. Also, to reallocate funds from two other projects funded from Operating Income that has been approved in the 2017 Capital Improvement Program. These projects are WWD-161 (Replace 700 Megahertz Radios, \$54,000.00) and WWD159 (Smart Cover and Smart Flow Monitoring Systems, \$30,000.00) for a total of \$84,000.00.

As you may recall, at the July 19, 2016 Council meeting, I put you all on notice that I would be coming back to you in the very near future to request a funding source from other approved projects to cover the construction of a slab and for the installation of the electrical, fiber and instrumentation for the Burnett Lime Equipment, as these items were not funded in the 2017 CIP.

Hussey Gay Bell completed the design of the remainder of this project on July 22, 2016. Chris Burke with HGB, Gary Moseley, SCADA Administrator and I met on Monday July 25, 2016 to review and make some minor revisions to the plans. As a note, EPD has approved the calculation for the lime dosing on July 21, 2016 (letter attached) and the construction plans were mailed to EPD today for their review.

Due to the NPDES permit violations that occurred in February and March of this year, this project is of utmost importance to be completed in a short time window. Therefore we are unable to follow the formal bid process for this phase of construction. Hugh Burnett with Burnett Lime Company has advised that the equipment is ready for shipment, but it will take at minimum 4 weeks before the slab can be constructed and go through a 14 day curing cycle. Once this has occurred, the equipment can be delivered and installed and we can run this system on manual by providing a temporary power and water supply, which we already have in place for the demo unit.

We are currently trying to acquire quotes for the electrical, fiber and instrumentation installation, but if we can't receive a quote under the \$20,000.00, which Robert, Deputy City Manager can approve, we plan to go through the formal bid process. I do believe that, if reallocation of the \$84,000.00 is approved that it should cover the remainder of this project, including engineering cost.

Attached you will find a letter of recommendation from Chris Burke from HGB, as well as the companies that he contacted to acquire quotes to perform the concrete work.

The quotes are as follows:

July 27, 2016

BRW	(Not to Exceed) \$24,890.00
Emmett G Renfroe Construction	\$25,000.00
Pinco	\$29,000.00
Southern Champion	\$30,000.00 to \$40,000.00

4 other contractors notified did not submit quotes, which are attached

This being said, it is my recommendation that Mayor and Council consider awarding a contract to the lowest quoter BRW in the amount of (Not to Exceed) \$24,890.00 to construct a concrete slab for the Burnett Lime Equipment to be installed on, as well as to reallocate the requested \$84,000.00 from 2 other projects to fund the completion of the Lime System installation.

As always, I appreciate any consideration given to my request.

**RE: CONCRETE SLAB FOR LIME SYSTEM  
CITY OF STATESBORO WWTP**

Dear Van:

We have contacted several contractors to obtain pricing for the concrete slab portion of this project. Of those contractors, Southern Champion Construction, BRW, PINCO and Emmett G. Renfroe Construction submitted budget pricing for the concrete slab. The prices ranged from \$24,890 to \$40,000, with BRW submitting the lowest firm price. Some of the prices received were verbal and budgetary due to the time constraints.

BRW is a very competent contractor that specializes in wastewater treatment plant construction. As such, BRW has extensive heavy concrete construction experience and has installed similar lime systems at several locations. In addition, BRW has agreed to discuss and provide budget pricing information on future projects at the WWTP to aid you in establishing future budgets. We believe that having BRW perform the work at the WWTP may result in numerous intangible benefits to the City of Statesboro.

We understand that without the lime addition the City's plant will have difficulty meeting the ammonia limits of the discharge permit. Therefore, a lengthy advertisement and bidding process is not desirable. We believe BRW's estimate is reasonable and recommend entering into a contract with BRW to perform the work as quickly as possible.

Please let me know if you need anything additional.

Sincerely,  
HUSSEY GAY BELL

Chris Burke, P.E.

Chris,

This is not a quote. We quickly looked at plan 53 & provide the following rough estimate. \$ 29,000  
If the owner wishes, we will gladly spend more time and provide a formal quote.

Thank you for the opportunity,

Dear Mayor Moore:

We have completed our review of the calculations submitted in response to our July 13, 2016 letter. The project involves the installation of a lime dosing system at the City of Statesboro Water Pollution Control Plant. We hereby concur with the document. The project consists of the following components:

- One (1), 16,000 gallon lime storage tank
- Two (2) metering pumps with a rated capacity of 33.72 gal/hr

Plans and specifications (P&S) may now be submitted to EPD. Please include the attached certification statement on the covers of both the plans and specifications. Also, send EPD an electronic set (PDF) of the plans for the above-referenced project for our files on a CD.

**MEMORANDUM**

TO: All Interested Parties

FROM: Linda MacGregor 

RE: **Certification Process for Plans and Specifications Submittals**

The Official Code of Georgia Annotated (OCGA) 12-2-2 establishes the authority of the EPD Director to “grant, deny, revoke, or amend all permits or variances provided for in the laws to be enforced by the division.” It also provides for an independent third party review, and includes the 2012 SB 427 provisions for timely processing and independent review. 2012 SR 1281 urges various stakeholder groups to cooperate with EPD to develop a formal process for approval of certified plans and specifications for water and wastewater treatment facilities in lieu of detailed review by EPD.

Recent discussions with stakeholders have identified significant means for EPD’s Watershed Protection Branch (WPB) to focus our resources. Representatives from the Georgia Association of Water Professionals (GAWP), American Council of Engineering Companies (ACEC), Georgia Municipal Association (GMA), Association of County Commissioners of Georgia (ACCG), and the Georgia Chamber of Commerce (GCC) have concluded that EPD’s role in wastewater infrastructure projects should be focused more towards “front-end” activities. Examples include water quality modeling and development of wasteload allocations, permit issuances, environmental reviews, and early-stage design/development reviews. These activities are generally regarded as those upon which WPB can provide the most valuable input. On the other hand, the stakeholders contend that technical review of construction documents, ie. plans and specifications, is less beneficial, and perhaps even unnecessary.

As a direct result of EPD’s collaboration with the stakeholder group, the following certification will henceforth become a required component of all wastewater infrastructure plans and specifications submitted for WPB approval:

I certify that I have been in responsible charge of the design of this project in accordance with the rules of the Georgia State Board of Registration for Professional Engineers and Land Surveyors. I further certify, to the best of my knowledge and belief, that these plans and specifications were prepared in accordance with current standard engineering practices and accurately reflect the Design Development Report (DDR) previously reviewed and concurred in by EPD. I further certify that the system as designed can reasonably be expected to consistently meet all currently applicable permit limits, conditions, and regulatory requirements, provided the facility is constructed as designed and properly operated and maintained.

Certification Process for Plans and Specifications Submittals

July 24, 2012

Page 2 of 2

Complete sets of plans and specifications containing this certification will generally be regarded as approvable in accordance with OCGA and the State's Rules and Regulations for Water Quality Control. As such, detailed technical review by WPB staff will not be required in such instances.
